

**REMARKS**

Claims 1-31 are pending in the application. Applicants acknowledge with appreciation allowance of claims 1-26. Claims 27-31 are hereby canceled.

In addition to the reasons for allowance noted by the Examiner in the March 29, 2005 communication, Applicants believe that pending claims 1-26 distinguish over Gates and all of the art of record, since the prior art fails to disclose a device for therapeutic and cosmetological photoprocessing of biological tissue comprising a power supply and a source of electromagnetic radiation made in the form of an incandescent lamp, a reflector for concentrating the radiation onto the biological tissue to be processed, a transparent dielectric in the form of a waveguide connected to a cooling system and adapted to be in contact with the biological tissue to be processed, and a spectral filter, wherein the incandescent lamp is connected to the power supply through a modulator, which comprises a resistometer of the incandescent filament of the lamp and a power regulator, and an inner surface of the reflector consists of a mirror surface made with an additional function of returning radiation reflected from the biological tissue being processed back to the biological tissue.

Application No. 09/719,497  
Reply to Office action of March 29, 2005

Group Art Unit: 3739  
Examiner: David M. Shay  
Atty. Docket No. 105090-240

**CONCLUSION**

In view of the above remarks, Applicants respectfully request that the Examiner pass claims 1-26 to issue. The Examiner is kindly invited to telephone the undersigned representative if there are any remaining issues.

Respectfully submitted,

NUTTER McCLENNEN & FISH LLP

Date: May 31, 2005
